***BORLAND URGES**

Says Packers Charge Con sumers War Prices, and Try To Stifle Inquiry.

Washington, D. C. Aug. 2.-Meat packers are getting war prices for beef products while trying to stiffe a federal inquiry into the meat packing industry, according to representative Borland of Missouri, in a speech in the house Wednesday in which he again urged a federal inquiry. He said the packers were paying enormous diviconds to their stockholders and were afraid of the publicity which an investigation would bring.

Livestock Priers Going Up. The Borland resolution, he pointed cut, now had been before the judiciary committee for six months, during which livestock prices had been going breadily unward.

which livestock prices had been going seadily upward.

The same power which could put down the cattle market in 1915, and put it up while this resolution was pending, could put it down again if the resolution were defeated, he said. The packers now own or control nearly everything that is valuable in connection with the livestock business. Not only are they the sole buyers for the farmers cattle, but they also control facilities for getting those cattle on the market.

on the market. The packers began a country wide The packers began a country wide propaganda omeng commission men and cattle raisers to secure letters and telegrams to members of congress opposing the investigation resolution. They feel that while the light of publicity is the principal weapon for correction of economic wrongs, if they enject to gain public confidence by stifling a public inquiry they may find that the result is exactly the opposite.

Arthe Are Decreasing.

Mr. Borland declared that in 1915

while the consumer was paying war prices, the Swift company's dividends amounted to 181 percent of its capital stock, the Armour company's a percent, the Morris company 71.2 percent, and the other companies 17.5 percent. At the same time he said, the meat producing industry had been managed so disadvantageously that there were only 27,000,000 head of cattle in the country, as compared with 20,000,000 in 1900. Cattle Are Decreasing.

Why we guard Tom Moore's reputation

TOM MOORE would not have been called for in cigar stores every day during the past twenty years if he had failed to make good.

It is impossible to build up a lasting reputation for a cigar unless that cigar has inherent merit. That merit can be quickly summed up.

First, there should be a clean-cut idea behind a cigar.

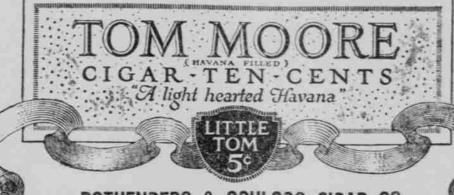

Second, that cigarshould be manufactured always true to that idea.

The idea behind Tom Moore is true Havana fragrance accompanied with true

Has Tom Moore kept true to this idea?

Yes. Tom Moore's friends have never known him to run down. For our part, we have been too long in the business to permit it. We have always been a bit jealous of Tom Moore's reputation-and always will be.

If you like a "light hearted Havana" type of cigar, Tom Moore is a safe cigar for your dealer to offer you, and a very safe and satisfying ten cents' worth for you to invest in.
